

Applications Engineer

JOB DESCRIPTION

Powervation is seeking an experienced Applications Engineer to participate in our exciting product development process. The successful candidate will work closely with our US and Irish technical teams (applications, IC design, software, etc.) together with Marketing, Sales, and FAE staff; additionally some interaction with customers, distributors, and partners will be needed. The role will include some travel; the travel will mainly be within North America, but occasionally overseas. You must be able to demonstrate an intimate knowledge of latest 'state-of-the-art' power conversion technologies and topologies, and must be fully conversant with latest power architectures, standards and practices for power conversion products and systems in the data networking and server markets.

LOCATION

San Jose, California

COMPANY DESCRIPTION

Powervation (www.powervation.com) delivers breakthrough digital power management IC solutions for designers of Communications, Computing, and power Point-of-Load systems. The company's digital power controllers with patented Auto-Control® technology provides the industry's first and only real-time adaptive compensation for DC/DC controllers, delivering significant customer benefits in performance, efficiency, reliability, and ease-of-use. Powervation is a private company backed by leading global VCs - SEP, Intel Capital, VentureTech Alliance, Braemar Energy Ventures, and 4th Level Ventures and is headquartered in Cork, Ireland, with sales/applications offices in San Jose, California and Hong Kong.
