

## Principal Analog Design Engineer

---

### JOB DESCRIPTION

Powervation is seeking an experienced Analog Design Engineer, with 7+ years experience, to participate in our exciting product development process. This is a senior design role reflecting the need for high-precision, mission-critical design elements that form an integral part of Powervation's mixed-signal power control ICs. The main areas of responsibility will include (but not be confined to) the design of high precision, low-power analog designs with excellent reliability performance for ICs in power conversion environments.

### LOCATION

Cork, Ireland

### COMPANY DESCRIPTION

Powervation ([www.powervation.com](http://www.powervation.com)) delivers breakthrough digital power management IC solutions for designers of Communications, Computing, and power Point-of-Load systems. The company's digital power controllers with patented Auto-Control® technology provides the industry's first and only real-time adaptive compensation for DC/DC controllers, delivering significant customer benefits in performance, efficiency, reliability, and ease-of-use. Powervation is a private company backed by leading global VCs - SEP, Intel Capital, VentureTech Alliance, Braemar Energy Ventures, and 4th Level Ventures and is headquartered in Cork, Ireland, with sales/applications offices in San Jose, California and Hong Kong.
