

## System Characterization Engineer

---

### JOB DESCRIPTION

We are seeking a seasoned System Characterization Engineer to participate in our exciting product development process. Your main responsibility will be the bench characterization, debug and documentation of the performance of our silicon application specific IC's. You will use our characterization hardware and software to perform detailed bench characterization of both analog and digital circuit blocks as well as full system verification of our mixed signal SOC products. You will be a key member of our technology, engineering and operations teams in a joint effort to reduce the cycle time between first silicon and full product release to volume manufacturing.

### LOCATION

Cork, Ireland

### COMPANY DESCRIPTION

Powervation ([www.powervation.com](http://www.powervation.com)) delivers breakthrough digital power management IC solutions for designers of Communications, Computing, and power Point-of-Load systems. The company's digital power controllers with patented Auto-Control® technology provides the industry's first and only real-time adaptive compensation for DC/DC controllers, delivering significant customer benefits in performance, efficiency, reliability, and ease-of-use. Powervation is a private company backed by leading global VCs - SEP, Intel Capital, VentureTech Alliance, Braemar Energy Ventures, and 4th Level Ventures and is headquartered in Cork, Ireland, with sales/applications offices in San Jose, California and Hong Kong.
